Educational Level:	8th – 12th Grade
	Applicable Subject Areas: Computers, Internet, English, Newspaper/Journalism
Field trip type:	Workshop
Educational Outcomes:	The student will be able to:

The student will be able to:

- Properly structure a basic web page using sections
- Identify Doc Types
- Use basic XHTML formatting tags to add & format text
- Embed an image, including alt tags
- Use an image as a hyperlink
- Save & view the web page
- Validate the web page to comply with W3C requirements

Content:	
Notes to instructor:	This activity should be done in a computer lab or classroom with laptop computers. Lesson can be taught using a basic Notepad editor. An Internet connection is necessary to download pictures & validate the web page. I can provide some power point slides as a starting point.
