

They Ate What? A Preliminary Look at Some of the Faunal Remains Recovered from 1MB513

Sean Coughlin, Sarah Coffey, and Bodine Degli Umberti

A Tale of Two Features

Feature 261 is a very large pit that produced copious amounts of faunal material from the upper strata, the final episodes of infilling from secondary refuse.

Feature 250 is a much smaller pit, containing a moderate amount of faunal material for its size.

Feature 261

Feature 250
